- b. NO EVIDENCE WAS DISCOVERED CONCERNING THE OPERATIONAL DEPLOYMENT OF SOVIET ICBM's.
- c. Our estimate of heavy bomber strength at a major soviet long range air-army field was confirmed. There is evidence at another field, however, that the soviets may be modifying some of their bear heavy bombers for a transport role.
 - d. NO NEW PROTOTYPE HEAVY BOMBER WAS DISCOVERED.
- e. 16 ADDITIONAL SURFACE-TO-AIR-MISSILE SITES INTENDED FOR OPERATIONAL USE WERE FOUND IN VARIOUS STAGES OF COMPLETION.
 THIS, IN ADDITION TO THE 21 DISCOVERED ON THE PREVIOUS MISSION,
 INDICATES THAT THE SOVIETS INTEND TO USE THIS SYSTEM EXTENSIVELY
 THROUGHOUT THE COUNTRY AND DO NOT INTEND TO CONFINE IT TO A
 LIMITED NUMBER OF KEY INDUSTRIAL AREAS.
